

# 7 Point Focus Sequence

By William Meng

1. For **TIME**, we focus on **NOW**,
2. For **WHAT** now we **DO**, focus on **URGENCY**.  
What to do besides urgency, we focus on **SEQUENCE**,  
**SHORT-TERM & LONG-TERM GOAL**
3. For **long-term goal**, we focus on the **WAY**,  
For **short-term goal**, we focus on the **RESULTS**.  
There is a Way if you have a Goal  
Firstly we made a **GOAL**, secondly we make a **WAY**.
4. **On the way**, we focus on **effectiveness first, then efficiency**.  
A **BIG** goal requires high efficiency, great productivity, enough energy.
5. **Before the way was built** we focus on **KNOWLEDGES**,  
AFTER knowledge we focus on **SKILL**.  
Skill requires **PRACTICE**, that's **EXPERIENCE**.  
For failure and success, we focus on **LEARNING**.
6. **Focus on to try without FEAR of the first MISTAKE**.  
Learn not to make the same mistake two times.
7. **PATIENCE is needed before the SYSTEM works and after with a small productivity**.

Focus on **EFFICIENCY** to increase the productivity for short term.

Focus on **PRODUCTIVITY CAPACITY** for long term.

# Energy fills the space beyond time

William Meng

Find the Space where you want to stay to do something

Space changes when you come to

You are energetic when you feel you like the space

Space is capacity for matter with shapes and shapeless

You love the shape or spirit

Something that you can not see really becomes what you need or love

Air takes the shape and fills full of the space

Water changes the shape and fills the bottom of the space

Somewhere you want to go where you know or never again

You lose your energy and feel that you do not need anymore

There is only love left in you

Energy is the only content for the space no matter time is
